## **Additional Information**

### **Current Price**

Prices shown are based on GSE closing prices on the date of the report. Prices may change in the days following publication due to ongoing market activity.

### **Liquidity Score**

The Liquidity Score is a simple measure of how available a stock has been for trade without significantly affecting its price within the 1-week period preceding the report.

### **How the Liquidity Score is calculated:**

The score is based on

**Trading activity** - frequency, number and size of trades

**Market depth** - availability of buy and sell orders

**Quote availability** - consistency of price quotations

### **Analyst Rating**

The Analyst Rating reflects IC's professional opinion based on the most recent published research report for that stock

### **As of Date**

This indicates the publication date (month and year) of the research report on which the rating is based. Information may change after this date as new data becomes available
