Additional Information

Current Price

Prices shown are based on GSE closing prices on the date of the report. Prices may change in the days following publication due to ongoing market activity.

Liquidity Score

The Liquidity Score is a simple measure of how available a stock has been for trade without significantly affecting its price within the 1-week period preceding the report.

How the Liquidity Score is calculated:

The score is based on

- **Trading activity** - frequency, number and size of trades
- **Market depth** - availability of buy and sell orders
- **Quote availability** - consistency of price quotations

Year to Date Performance

YTD Performance- The percentage change between the current price and the price at the start of the year

Market Position

Market position is based on the stock's standing in the market relative to buying and selling pressure, determined by the bid and offer volumes posted on the GSE

Net Bid - When total bid volume exceeds total offer volume
Net Offered - When total offer volume exceeds total bid volume
